Oriental Hospital

Oriental hospitals are different from western hospitals. Doctors at oriental hospitals feel a patient's pulse for diagnosis, and prescribe treatments such as acupuncture, moxa cautery, and herbal medicine. Oriental treatment is not about eliminating the disease, but rather strengthening our body's immune system against disease. Each individual is treated according to his/her unique physical constitution. The main ingredients in herbal medicine are natural elements from plants and animals, which reduces the possibility of side effects.

※ Korea's prescription law

Korea's prescription law that separates dispensary from medical practice requires patients to receive a doctor's prescription and submit it to a pharmacist who prepares the medicine. Pharmacies are usually located near hospitals, so it is easy to spot them.
